# HIGHEST RANKED WILDLIFE HABITAT BY ECOLOGICAL CONDITION

-  Highest Ranked Habitat in NH
-  Highest Ranked Habitat in Biological Region  
Biological region = TNC ecoregional subsection for terrestrial habitats or watershed group for wetlands and forest floodplain.
-  Supporting Landscapes *(of regional significance)*
-  Wildlife Habitat not top-ranked  
*(locally significant habitat scores to be determined)*
-  Developed land cover
-  Conservation or public land

- Information about habitat condition was analyzed to develop a statewide and regional ranking and identify the highest quality habitat relative to all polygons of a given habitat type in the state.
- The goal is to provide regional planners and conservation professionals a tool in identifying the most critical wildlife habitat locations.
- Results will be re-evaluated to monitor the effectiveness of conservation actions and respond appropriately to new information or changing conditions.

*Please refer to accompanying documents describing habitat condition/scoring.*
